# Тесты

Тест 1(n = 15)

```
format long;
n = 15;
H = hilb(n);
e = ones(n,1);
b = H*e;
x_lu = LU_solve(H,b);
x_qr = QR_solve(H,b);
```

### Норма погрешностей:

```
norm(x_lu - e)
ans =
    8.618088265912967

norm(x_qr - e)
ans =
    1.515345701284949e+02
```

### Исследование влияния параметра регуляризации:

```
alpha = 1e-12;
E = eye(n);
d = zeros(1e4,1);
for i = 1:1e4
    A = H + alpha*i*E;
    x = QR_solve(A,b);
    d(i) = norm(x - e);
end
semilogx(alpha*(1:1e4),d);
title('QR');
xlabel('$\alpha$','Interpreter',"latex");
ylabel('d');
```

```
